PERFORMANCE

The graphs indicate the typical performance characteristics of the motors operating with mineral oil (standard ISO 68).

CARATTERISTICHE

I grafici si riferiscono alle caratteristiche dei motori operando con olio minerale (standard ISO 68).

STARTING / STALLING TORQUE

The output torque of the motors does not fall off at stalling speed. The graphs above indicate the starting torque of the motors (torque at 0 rpm).

BEARING LIFETIME (See page 9)

The graph refer to motors with standard spherical roller roller bearings.

Note that the average lifetime of a bearing (B_{50} lifetime) is approximately 5 times the B_{10} lifetime.

COPPIA DI SPUNTO / STALLO

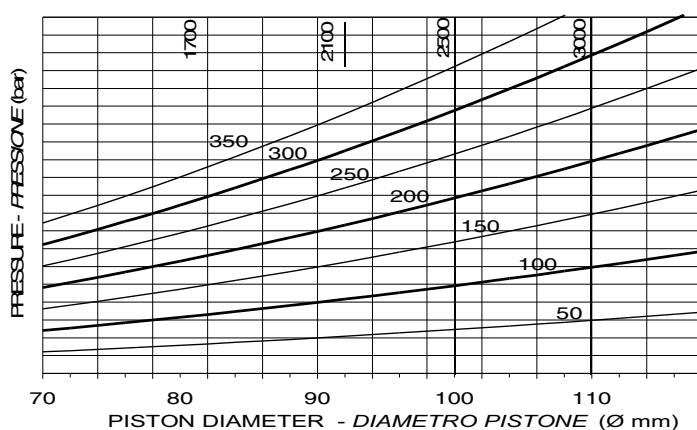

La coppia erogata dal motore non diminuisce in prossimità della velocità di stallo. I grafici indicano la coppia di spunto dei motori (coppia a 0 rpm)

VITA CUSCINETTI (vedi pagina 9)

I grafici si riferiscono a motori con cuscinetti a rulli orientabili standard.

Notare che la vita media di un cuscinetto (vita B_{50}) è circa 5 volte superiore alla vita B_{10} .

MOTOR DISPLACEMENT - CILINDRATA MOTORE

B10 LIFETIME - VITA B 10

BEARING OPTIONS

Higher capacity Spherical roller bearings (on request) - the lifetime is approximately 1.6 times the equivalent lifetime of the roller bearings

OPZIONI CUSCINETTI

Cuscinetti a rulli orientabili a capacità maggiorata (su richiesta) - la vita dei cuscinetti a rulli orientabili è 1,6 volte l'equivalente vita dei cuscinetti standard.
